Seam, IBM partner to form cotton blockchain consortium

January 09, 2017 - United States Of America

The Seam, a commodities trading and agribusiness software provider has partnered with IBM to form a blockchain consortium for the global cotton industry. The company intends to lead an industry-wide collaboration initiative to create a supply chain and trading ecosystem built on IBM blockchain technology, specifically using the hyperledger fabric.

Blockchain nella Supply Chain dell'Abbigliamento

The **LOOMIA TILE** is a hardware device that transforms clothes into data-collecting and identity tools.

It works in conjunction with the **LOOMIA Electronic Layer (LEL)**, a soft flexible circuit embedded into textiles with the ability to sense changes in its environment, such as heat and touch.

The app is completely serverless and **leverages the blockchain for security** and data integrity.

It makes it possible to build applications using LOOMIA technology to **verify identity and facilitate secure payments passively and seamlessly, with no manual interaction or interface.**

Blockchain nella Supply Chain del Fashion

Babyghost and VeChain: Fashion on the Blockchain

The world of fashion met the world of blockchain technology at Shanghai's Fashion Week. When independent, trendy fashion label [Babyghost](#) teamed up with Shanghai-based Blockchain-as-a-Service (BaaS) company, [BitSE](#), and its [VeChain](#) project, the result was a multidimensional sensory feast for the fashion crowd.

Community NdT

Community NdT: dove contano i fatti.

Workshop Formativo- su invito-

Milano, 24 novembre 2017, dalle 14,30 alle 18,30

“Blockchain: capirla sin da subito per usarla al meglio”

Il workshop, di carattere formativo e informativo, vuole essere una base per creare cultura e conoscenza intorno a questo tema di cui ormai si legge ovunque.

La partecipazione è su invito.

L’iniziativa è a cura della **Community NdT** (Il naso di Tommaso), un gruppo di aziende disposte a partecipare a progetti pilota da esse stesse selezionati, utilizzando le tecnologie messe a disposizione- in forma gratuita- dal Partner della Community.
