Controllo di “product mix” e marginalità

The screenshot displays the Infor Fashion PLM interface. At the top, a 'Collection Plan' table shows the following data:

| Line Plan Name | Brand | Season | Status | # of Styles | # of New Developed... | # of Carry Overs | Planned Quantity | Purchase Value (Base) | Cost Value (Base) | Retail Value (Base) | Retail Margin Value (...) | Retail Margin % |
|---------------------------------------|-------------|-------------|------------|-------------|-----------------------|------------------|------------------|-----------------------|-------------------|---------------------|---------------------------|-----------------|

Below this, a 'Line Plan' view shows individual items like 'SP15 Pants - 27' through 'SP15 Pants - 36', each with a small image and key attributes like Category, Price Point, and Size Range.

To the right, a 'Line Plan Comparison' table compares planned vs actual data:

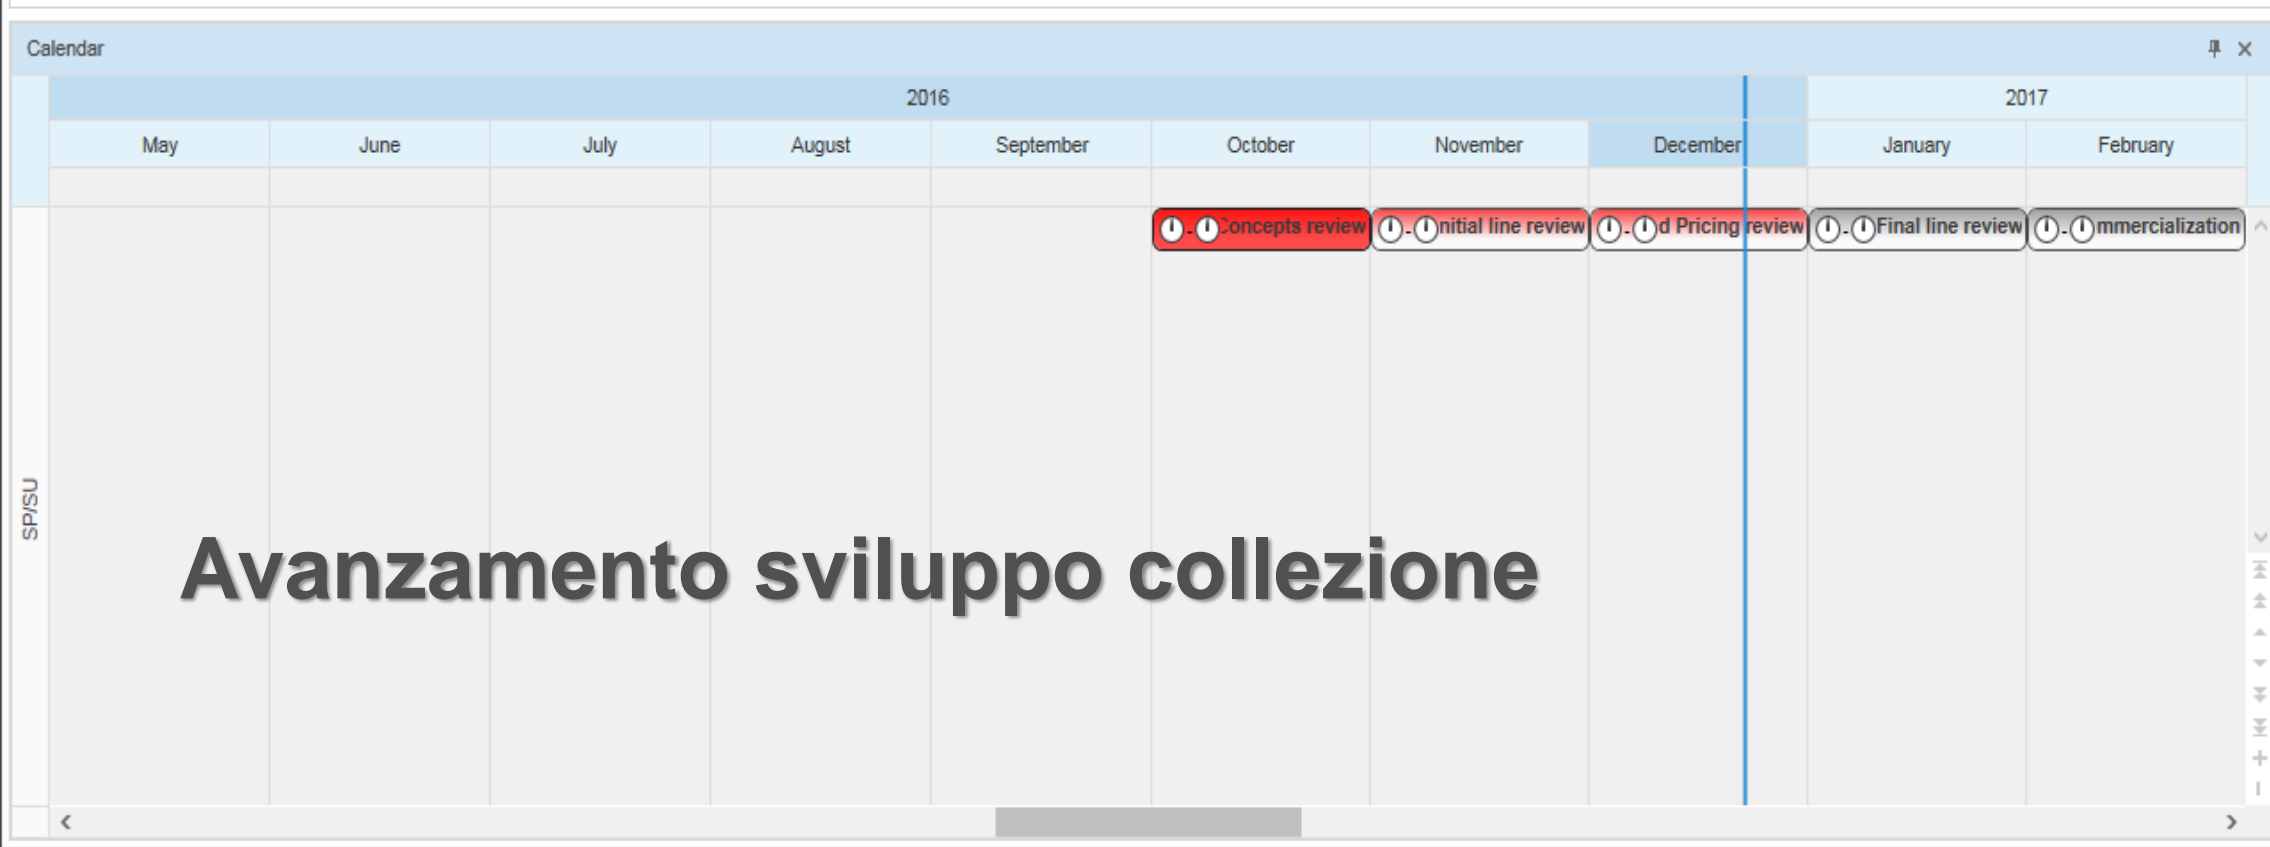

| Line Plan Name | Category | # of Styles | # of New Developed... | Planned Quantity | Actual Quantity | Purchase Value (Base) | Purchase Value Base (Actua) |
|---------------------------------------|------------|-------------|-----------------------|------------------|-----------------|-----------------------|-----------------------------|
| Collection Plan Name: Spring 15 Women | | 26 | 17 | 80000 | 68600 | \$ 2,150,000.00 | \$ 2,123,960.00 |
| SP15 Pants | Pants | 10 | 8 | 10,000 | 11,000 | \$ 450,000.00 | \$ 529,290.00 |
| SP15 Shirts | Sweatshirt | 6 | 4 | 40,000 | 33,000 | \$ 800,000.00 | \$ 0.00 |
| SP15 Jackets | Jacket | 4 | 2 | 10,000 | 8,000 | \$ 450,000.00 | \$ 484,500.00 |
| SP15 Dress | Dress | 6 | 3 | 20,000 | 16,600 | \$ 450,000.00 | \$ 1,110,170.00 |

At the bottom right, a bar chart compares 'Collection Plan Total' (blue) and 'Line Plan Total' (red) across various metrics: Retail Value, Wholesale Value, Cost Value, Purchase Value, and Planned Quantity. The chart shows that the Line Plan Total is consistently lower than the Collection Plan Total across all metrics.
